

THE QUALITY OF OUR ENVIRONMENT IS EVERYONE'S RESPONSIBILITY

ENERGY STAR is a joint program of the U.S. Environmental Protection Agency and the U.S. Department of Energy helping us all save money and protect the environment through energy efficient products and practices.

NPL is doing its part to protect the environment and as we moved into our new offices on Utopia Road, the following measures were taken:

Landscaping:

- drought tolerant bushes,
- "desert landscaping",
- no grass.

Interior & Exterior Construction materials:

- recycled materials such as the ceiling tiles and carpeting,
- interior lights that are motion sensitive,
- costly pressure integrated water-on-demand piping,
- low flow water,
- energy saving appliances,
- double-paned interior and exterior glass,
- an interior design which allows for natural light to flow throughout the inside of the building,
- energy saving air conditioning unit,
- power saving devices on all computers, monitors, copiers and laser printers,
- water based glues and paints (low chemical).
